

# PREPARING FOR YOUR APPOINTMENT

Below are a few Simple Checklists to Ensure the Best Results & Safety While **HYDROPRO** Is On Site, As Well As How To Proceed After The Work Is Complete & Begin Enjoying Your Freshly Cleaned Home!

## HOUSE WASH

### Ensure All Windows & Doors Are Completely Closed.

If there is an area that is known to leak please let us know in advance.

### Please TURN OFF ALL Outside Lights & Fans & Allow 8 hrs before turning on.

Please ensure all electrical outside lights & fans are switched **OFF**. We will take care of any gas lanterns and their relighting. Failure to do so may result in an inability to clean that area, or in some cases a rescheduling of the appointment. Please allow min. of 8 hrs before turning lights/fans to ensure adequate drying of any residual water. We tape off any outlets and similar items to prevent water infiltration.

### Remove any Valuable, Sensitive, or Irreplaceable Items.

Mainly limited to front/rear porch & patio & outdoor living. **We will move any furniture & remaining electrical/sensitive items & cover anything too large or heavy to be moved.** We will take pictures prior to moving for reference and place items back as we found them. We tape off any outlets to prevent water infiltration.

Outdoor TV's will be unplugged and covered in plastic. The area around the TV will be cleaned as thoroughly as possible. Any outdoor outlets we encounter will be taped off and any item plugged into them may be temporarily unplugged to allow a safe cleaning of that area.

## ROOF WASH

### Please TURN OFF ALL Outside Lights.

Please ensure all electrical outside lights are switched **OFF**. Your fascia boards, soffit, and gutters will be rinsed during the roof cleaning and lights may be exposed to moisture. Switching them off and waiting a min. of 8 hrs will allow any residual moisture time to dry.

### Notify us of any suspected leaks or issues with the Roof.

If there are areas where a leak is suspected please let us know prior to the appointment as it will need to be rescheduled. Additionally a large majority of the roof will be sprayed from a ladder, but in some instances we may need to mount the roof. If there are any structural issues or soft spots please let us know to ensure safety for all.

### Notify us of any Gutter/Drainage Issues

If there are leaks in the gutter system or drainage issues please notify us so we may take extra care in protection of any landscape or other items that may be affected. Any Items or Plants within the drip zone will be moved/covered.

Plants and Landscaping will be Pre-rinsed and covered with vapor barrier for protection if needed. All Landscaping will be watered during the process as well as a thorough post watering. Some yellowing of grass/landscaping near downspouts or drip lines may be observed but it is only temporary and will return quickly.
